

Obligatory Secondary Education

Activity

# We are all artists!

## OBJECTIVES

- Use art to extend the culture of sustainability
- Create atmosphere in the school playground
- Involve students in the day-to-day life of the school

## SKILLS DEVELOPED

- Linguistic communication.
- Processing information and digital competence.
- Humanistic and artistic culture
- Autonomy and personal initiative

## MATERIALS

- Blackboard
- Materials to make a mural

## Development

Many years have passed since the drawings on the walls of the school were renewed and the management thought that it was time to tackle this theme. But they did not know exactly how to do this, so they decided to get together with the students to think about the design of a wall in the playground and carry it out. The theme of the mural was to be: the sustainable school.

As a first step, with everyone, you should classify what characteristics make a centre a sustainable school and what make it a non sustainable school.

### SUSTAINABLE SCHOOL

### UN-SUSTAINABLE SCHOOL

SUSTAINABLE SCHOOL	UN-SUSTAINABLE SCHOOL

Afterwards, the students divide up into small groups and, bearing in mind the characteristics that a sustainable school must have, fill in the following data sheet:

### Proposal of mural for the centre sustainable school

Name of the group

Message of the mural  
(poem, verse, slogan ...)

Sketch of the image

Once all the proposals are collected, a participation process will be set up to know the opinion of the school community and decide what they like best. To carry out the vote you can use any of the digital platforms existing on Internet with the aim of reaching more people.

If the initiative is successful and many quality proposals are presented, in addition to painting the the wall intended in the first place, it is possible to expand the activity to other places. For example?
